

Power Plant Worker Appreciation Day

We power life. SM

Power Plant Worker Appreciation Day

In 2023, we celebrated Entergy's inaugural Power Plant Worker Appreciation Day on the first Wednesday of September 2023. We will be continuing this recognition in 2024.

Vision

Ensuring power plant workers know their importance in powering our lives.

Mission

To bring visibility and awareness to the dedication and sacrifice that power plant workers and their families show daily.

Overview

This observance works to celebrate the unsung heroes that power our lives.

Our employees work around the clock in challenging conditions to keep our lights on. We want to take a moment to appreciate their dedication and the role they play in our everyday lives. Their expertise is unmatched as they oversee intricate systems and applications, troubleshoot problems, and ensure the seamless operation of power generation facilities. Their dedication to safety protocols and adherence to procedures are essential in delivering uninterrupted electricity to our homes and businesses.

From operators to engineers, maintenance to management, and technicians to business support; every employee works in sync to tackle challenges, adapt to new technologies, and continually enhance operations. Together, we uphold reliability, efficiency, and resilience with power generation.

From operators to engineers, maintenance to management, and technicians to business support; every employee works in sync to tackle challenges, adapt to new technologies, and continually enhance operations. Together, we uphold reliability, efficiency, and resilience with power generation.
